PARK USER STATISTICS 1985
INTRODUCTION

Alberta Recreation and Parks is pleased to forward for your use the Ninth Annual User Statistics Report. This report summarizes camping and day use visitation for the period May 15, 1985 to September 15, 1985. Information is presented for all Provincial Parks, as well as those recreation areas where a camping fee is charged. Regional summary tables and graphs are included with each region section and the Provincial summary table can be found in Appendix I.

The co-ordination, design and preparation of this report was carried out by I.D. Systems Ltd. of Edmonton, Alberta. Data collection was carried out by the field staff in the parks. Steve Amos, Systems Development Branch, Alberta Recreation and Parks implemented the computer programs and Barry Bentham of Alberta Recreation and Parks served as Project Manager. Any comments concerning the compilation, analysis and presentation format of the statistics are welcomed by Alberta Recreation and Parks, Field Support Branch.

FORMAT

The format for Individual Provincial Park Statistics concerning camping and day use during the summer season remains the same as that of last year. The handbook is alphabetically organized by region and, within each region, alphabetically by parks. The camping and day use parks are followed by day use only parks. Multiple campground parks are presented with the table and graph for the total park shown first, followed by separate tables and graphs for each campground within the park.

Kananaskis Country has been broken down into three districts for ease of data collection and reporting of same. These districts are East District; Central District and West District. The tables and graphs for the various districts in Kananaskis are preceeded by a summary table and graph for Kananaskis Country.

Interpretive statistics for a number of parks are located on data format sheets at the end of each regional section. Definitions can be found in the Glossary of Interpretive Terms and in Appendix VII. Appendix VII entitled "Inaccuracies and Problems Occurring in Data" has again been included because these problems are still occurring to some extent.

Previously the Table of Contents for each region indicated whether a park was a self-registration or a day use study park. In this year's handbook this information is indicated on the actual park table. Self Registration parks have been so labelled on each table. The majority of parks have been added to the Day Use Study Program. The few remaining parks not yet on the Day Use Study Program have been labelled (residual calculation) after the day use statistics heading. (For further information regarding Day Use Statistics see "How User Statistics are Calculated").

When using Alberta Provincial Parks User Statistics 1985, some points should be noted. These include:

1. a rounding factor has been designed into the computer program and therefore percentages may not equal one hundred percent when added;

2. data may have been incomplete on the Monthly Park Attendance Report and therefore totals may be underestimated (these are more fully explained in the Appendices).

GLOSSARY OF TERMS

Campground Capacity	- Number of camping sites available for use during the 1985 summer season.
Individual Camper Night (Camper Day)	- The passing of one night, in the park, by one camper.
Camping Party	- A single person or group of persons occupying one camping accommodation unit. If the park is on the self-registration system a camping party is equal to an occupied site.
Camping Party Night	- One camping accommodation unit staying one night or, in the case of parks on the self-registration system, one site occupied for one night.
Peak Night(s)	- Night(s) of highest campground occupancy during the summer season.
Day User Day	- One person making a recreational visit to a park for one day or portion of one day without staying overnight.
Non-Recreation Vehicles	- Vehicles entering the park for purposes other than recreation, including service, commercial, construction and park vehicles.
Weekend Night	- A normal weekend includes both Friday and Saturday nights. A long weekend includes Friday night, Saturday night and Sunday night.
Weekday Night	- Includes Sunday night to Thursday night. However, when a long weekend occurs, Sunday night is included as part of the long weekend.

GLOSSARY OF SYMBOLS

E - Figures must be regarded as estimates only

X - Statistics Not Available

HOW USER STATISTICS ARE CALCULATED

Campground Capacity - Figures from the Facilities and Services Inventory, December 1984.

Vehicles, Total - Total number of vehicles entering the park (from Park Monthly Attendance Reports).

Vehicles, Non-Recreational - Total number of vehicles entering the park on weekdays and weekends for purposes other than recreation, including service vehicles, park patrol and R.C.M.P. (based on estimates calculated from sample counts of vehicles entering the park).

Vehicles, Camping - Total number of vehicles entering the park on weekdays and weekends for the purpose of camping overnight (based on number of camping permits sold each day).

Vehicles, Day Use - Total number of vehicles entering the park on weekdays and weekends for day use only, is based on: (Total number of vehicles entering the park) - (Number of Non-recreation vehicles + Number of Camping Vehicles).

Number of Day User Days - Total number of people using the park during the day only. This figure is estimated based upon Automatic Traffic Counter records, adjusted to account for counter error, non-day use traffic and average day use party size. These factors are derived from a periodic traffic survey conducted at each park. Number of Day User Days in parks not yet surveyed is based on sample counts of estimated number of Day Users per vehicle x number of Day Use vehicles. (Parks using the latter calculation are indicated with the note 'residual calculation' at the top of the Day Use table).

Average Day Use Party Size - Number of people per day use vehicle. This figure is derived from a periodic survey of traffic conducted at each park and is calculated on a seasonal basis only.

Number of Camping Party Nights - Number of Tents + Tent-Trailers + Trailers + Truck-Campers or, in the case of parks on the self registration system, the total number of occupied sites per night, summed for the season.

Percent Capacity - $\frac{\text{Number of camping parties in park on a given night}}{\text{Campground capacity}} \times 100$

Average Daily Occupancy, Weekdays - $\frac{\text{Total camping parties on weekdays}}{\text{Campground capacity} \times \text{number of weekday nights}} \times 100$

Average Daily Occupancy, Weekends - $\frac{\text{Total camping parties on weekends}}{\text{Campground capacity} \times \text{number of weekend nights}} \times 100$

Number of Individual Camper Nights (Camper days) - Total number of individual people camping in the park (from monthly Park Attendance Reports and Monthly Self-Registration Summary Sheets).

Average Camping Party Size - $\frac{\text{Number of Individual Camper Nights}}{\text{Number of Camping Party Nights}}$

Average % Camping Occupancy (Summer Season: May 15 - September 15) - $\frac{\text{Total camping party nights for the summer season}}{\text{Campground capacity} \times \text{total number of nights}} \times 100$

GLOSSARY OF INTERPRETIVE TERMS

Guided Trip: - Guided walks and hikes and also events that use a means of transportation such as canoes, bicycles, A.T.V., horses, skis, snowmobiles etc. Usually 1/2 hour to a full day which follows a predetermined route.

Guided Tour: - Similar to a Guided Trip except the message and location remains unchanged throughout the season, eg., Dinosaur Bus Tour, tour of a building or site, Writing-On-Stone Pictograph walk, staff-led A/V or exhibit presentation in a visitor centre, etc.

Point Duty: - An event that occurs at one site. The message may relate to the site or it may be presented at a site to take advantage of visitor concentration. In either case, the staff person remains at one site, presents a planned message and answers questions.

Interpretive Roving: - An event where the interpreter moves through a campground or day use area presenting a planned message at various points. This event may include advertising as a minor part of the message. Generally, after the presentation there is time for informal, person to person communication with visitors.

Environmental Education Event: - Audience is usually a school group but may be any organized group. Park staff conduct the event and present environment education concepts.

Children's Event: - These specifically designed events feature a high degree of audience participation. A heterogenous mix of children from campground and/or day use areas comprise the audience.

Family Event: - Audience consists of a variety of famly groups from campgrounds and/or day use areas. These events have a high degree of audience participation and are designed so that adults (parents) participate in learning activities with the children.

Leadership Workshop: - Audience is a homogeneous group. The event is designed to upgrade specific skills and/or knowledge of a specific topic, i.e., workshops for teachers, rangers, recreation leaders etc.

Community Event:	- An event involving citizens from a community within the boundary of a park or recreation area. The event is designed to bring the community population to the park to participate in the event. A variety of types and presentation techniques may be used, i.e., puppet shows, art exhibits, skills participation, heritage presentations, skits, etc.
Recreation Event:	- A structured recreation event may include skills teaching, appreciation of skills, and/or visitor participation in skills.
Special Event:	- Events are presented in the management area. They are planned around a phenomenon, message or topic that occurs only once or occurs over a short period of time, i.e., summer solstice, elk call, one-time flower or bird hike, guest speaker, etc. This category has no specific target audience and is developed for general campground and/or day users.
Extension Event:	- A visitor services event conducted by parks staff outside the management area. Topic and audience may vary, i.e., school groups, club meetings, conferences, etc.
Major Event:	- An evening or daytime event that takes place at an established site (amphitheater, firering, shelter, visitor centre, etc.). Delivery may be formal or informal (a formal amphitheatre event or a more informal campfire event). These events use a variety of presentation techniques (drama, A/V, props, demonstrations, puppets, music, dance, etc.).
Information Roving:	- Staff move through campgrounds and/or day use areas to advertise programs and/or inform visitors about recreational opportunities and facilities through informal person to person contacts. Some interpretive natural/cultural information may be included but only as a minor part of this type of roving.
Visitor Centre:	- Staff in a visitor centre providing information to visitors about the recreational opportunities and facilities through informal person to person contacts. Some interpretive natural/cultural information may be included but only as a minor part of this type of visitor contact.
Checking Station/ Administration Building	- Phone-in and face to face information requests that take place at checking stations and administration buildings. This information goes beyond the normal campground check-in information given to all visitors.

Note: All numbers represent the estimated number of visitors that entered the facility. The estimate represents the number of recreation vehicles that entered the facility, as would be recorded by a traffic counter, times the average number of visitors per vehicle, as established from a survey of vehicles.

This method of calculation counts vehicles at each facility that they enter, therefore visitors that enter more than one facility are counted at each facility that they enter. The total of all facilities use is therefore greater than the number of visitors.

Inaccuracies and Problems Occurring In Data

APPENDIX VII

INACCURACIES AND PROBLEMS OCCURRING IN DATA

Number of Camper Nights. This figure indicates the total number of people camping in the park each night. In parks where there is an entry gate with staff registering each camper the number is filled in by the park attendant.

There appears to be confusion in some parks regarding how this figure is tabulated. Instead of tallying the total number of campers in the park each night several parks are using a multiplier (generally 3) and multiplying the number of camping vehicles in the park each night by the number to give a rough estimate of the number of camper nights. They are assuming that each and every camping party has three (3) people in it.

Number of Day User Vehicles. This figure is generally accurate in all parks that have a day use area or areas except for those ten parks that are not under the day use study.

East Central Region - Garner Lake and Long Lake.

Northern Region - Lesser Slave Lake and Saskatoon Island.

Southern Region - Cypress Hills and Midland.

West Central Region - Fish Creek, Hasse Lake, Jarvis/Sylan Lake and William A. Switzer.

For the parks not yet on the day use study, generally day use figures are inflated due to errors in counter readings. Since vehicle figures are balanced to the total number of vehicles by adjusting the number of day user vehicles, these numbers must be regarded as estimates.
